These two view buttons are only for navigating to sample voting pages in this wireframe since I don't know how to make the URLs clickable. The actual projects won't have these view buttons.

We should not allow the creator to edit an existing poll since it may cause inaccurate results. Think about this scenario. In the beginning, the creator asked you "do you like Starbucks." You answered Yes. Later, the creator changed the question to "do you hate Starbucks." It'll be really inappropriate.
